

The Green Purchasing Law, and Promoting Green Procurement in Japan

October 7, 2005

Presentation by Hideki Onizaki

Ministry of the Environment, Japan

**1. Law Concerning the Promotion of
Eco-Friendly Goods and Services by
the State and Other Entities**

Process for Establishing the Green Purchasing Law

1. At the Earth Summit of 1992, participating countries agreed on Agenda 21, which stresses the importance of Green Purchasing by public organizations to reduce environmental loads.
2. As a result of Agenda 21, the Japanese Government took the initiative to promote Green Purchasing.
3. The Japanese Government introduced the Green Purchasing legislation to address the issues highlighted in the Rio Declaration, while simultaneously furthering the promotion of Green Purchasing.
4. One of the six laws created to establish a recycling-based society, the “Law Concerning the Promotion of Eco-Friendly Goods and Services by the State and Other Entities,” was enacted in May 2000.
5. The Green Purchasing Law came into effect on April 1, 2001.

Objectives of the Green Purchasing Law

Objectives

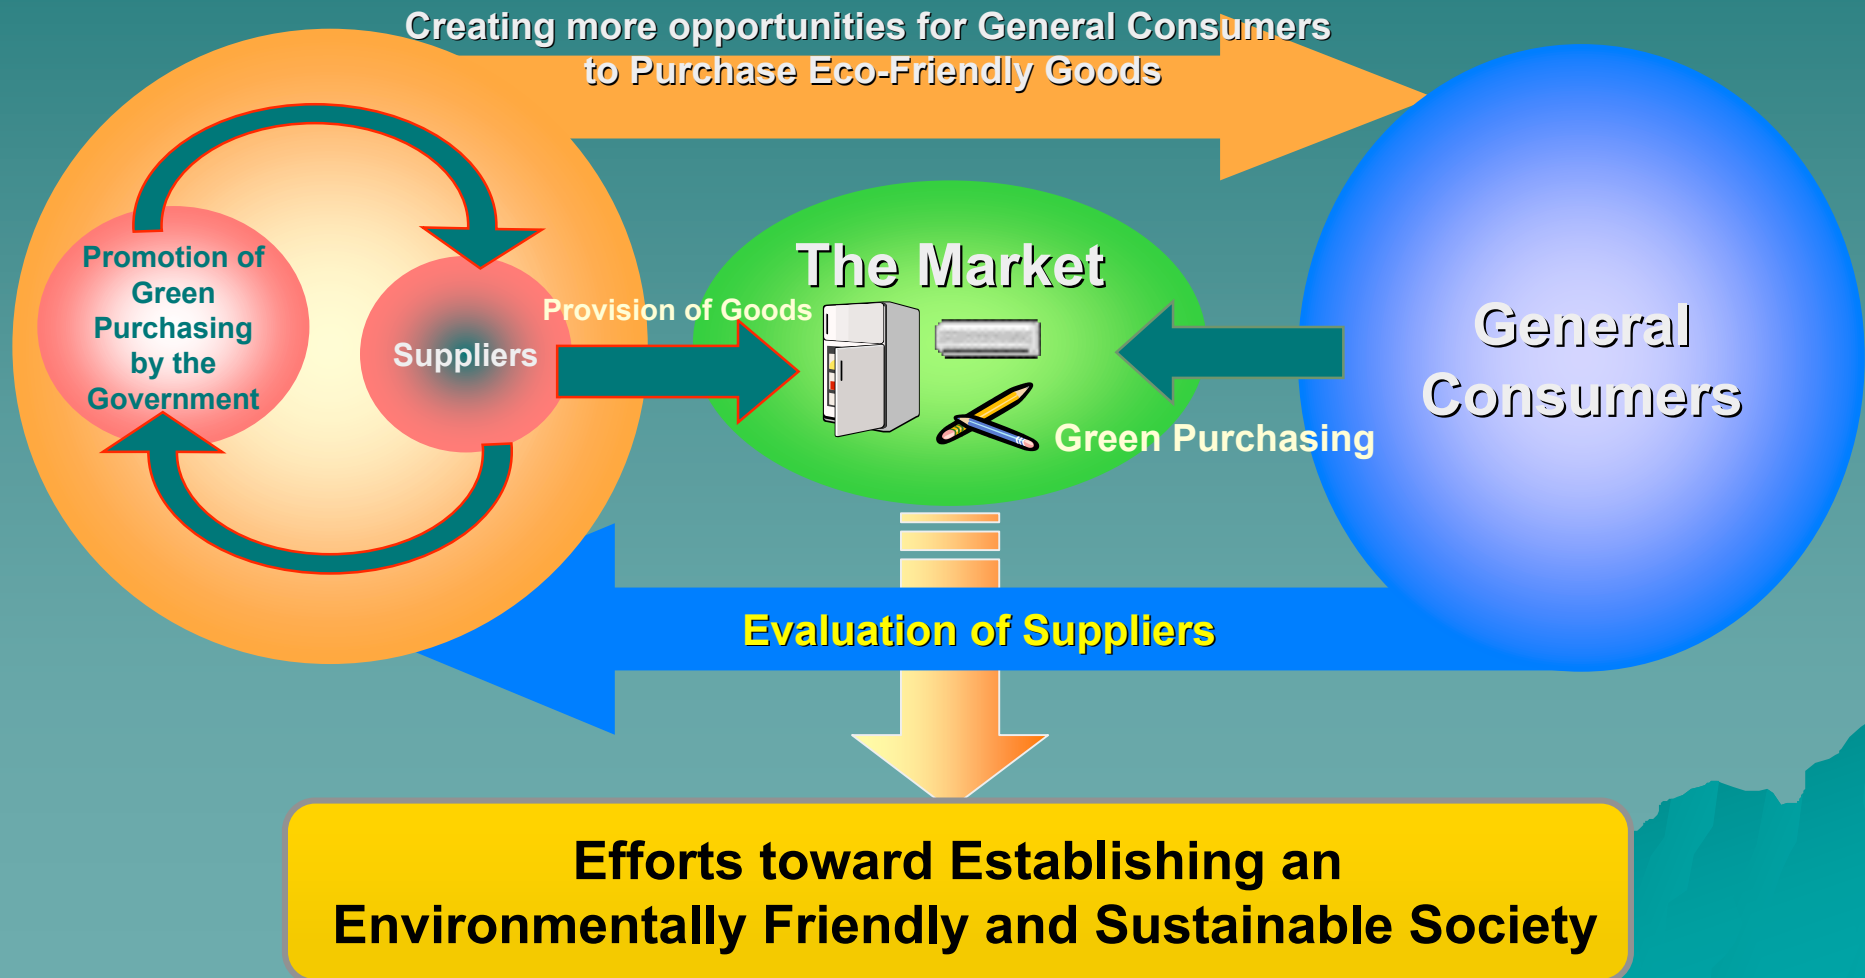

Goods and Services that contribute to reducing Environmental Loads (Eco-Friendly Goods and Services)

- Promoting Greener Purchasing by Public Organizations
- Providing Information on Eco-Friendly Goods and Services

Establishment of an Environmentally Friendly and Sustainable Society

- Encourage suppliers (businesses/private firms) to develop products that contribute to reducing environmental impacts
- Promote environmental awareness among businesses on corporate activity
- Influence suppliers through market mechanisms from the demand side

Mechanism of the Green Purchasing Law (1)

Promotion of Greener Purchasing By Ministries and Agencies

Establishment of the Basic Policy for the Procurement of Eco-Friendly Goods etc.

- Direction for Promoting Green Procurement
- Designated Procurement Items and Evaluation Criteria

Ministries and Agencies

Each Organization creates and publicizes a Procurement Policy

Procurement of goods and services based on Procurement Policies

Report on the results and achievements of Green Procurement

Requests from the Minister of the Environment and other ministries to be taken into account

Local Governments

- Create or update existing versions of green procurement policies every fiscal year
- Procure goods and services based on the policies

Ministries and agencies should not increase or adjust their total procurement amount for the reason of implementing this law.

Responsibility for Businesses / Citizens

Consciously purchase eco- friendly goods as much as possible

Mechanism of the Green Purchasing Law (2)

Provide Appropriate Information on Environmentally Friendly Goods and Services

Manufacturers

Provide environmental information on their products

Environmental Labeling Organizations

Promote eco-labeling programs highlighting their scientific analysis, while complying with international eco-labeling standards

The Government

- Manage and analyze information provided by manufacturers and environmental labeling organizations
- Provide guidelines on appropriate information methods on eco-friendly goods and services

Overview of the Basic Policy (1)

Basic Philosophy for Procurement of Eco-Friendly Items

- Environmental attributes should be considered in addition to price and quality considerations
- Consideration from environmentally diverse viewpoints:
 - Products that contribute to the formation of a socio-economic system through an environmentally sound material cycle
 - Products that contribute to reducing greenhouse gases
- Consider reducing environmental impacts throughout the product's lifecycle, from manufacture to disposal.
- Commit to long-term use, correct utilization, and appropriate disposal of procured goods and services
 - (separation into appropriate waste streams)

Overview of the Basic Policy (2)

Designated Procurement Items and Evaluation Criteria

- As a general rule, clear numeric data shall be used for selecting designated procurement items.
- If clear numeric criteria cannot be established, attributes that contribute to reducing environmental impact shall be defined as “factors for consideration.”
- As needed, these standards can be revised in response to product improvement, market development, and further development of our scientific knowledge of the products.
- When items included in the designated procurement items list become readily available in the marketplace, the item shall be omitted from the listing. (i.e. televisions, calculators)

Categories	Designated Procurement Items
Paper (8 Items)	Copier Paper, Printer Paper , Toilet Paper, and 5 other items
Stationery (76 Items)	Ballpoint Pens, Scissors, Glue, and 7 other items
Office Furniture (10 Items)	Chairs, Desks, Shelves, and 7 other items
Office Automation Machines (11 Items)	Copiers, Printers, Fax Machines, and 7 other items
Home Electronic Appliances (4 Items)	Electric Refrigerators, and 3 other items
Air Conditioners, etc. (3 Items)	Air Conditioners, Gas Heat Pump Air Conditioners, Space Heaters
Water Heaters, etc. (4 Items)	Electric Hot Water Supply System, Gas Cooking Appliances, and 2 other items
Lighting (2 Items)	Fluorescent Lighting Equipment, Fluorescent Light Bulbs
Vehicles, etc (3 Items)	Vehicles, ETC Adaptable Car Accessories, VICS Adaptable Car Accessories

Categories	Designated Procurement Items
Fire Extinguishers (1 Item)	Fire Extinguishers
Uniforms and Work Clothes (2 Items)	Uniforms, Work Clothes
Interior Fixtures / Bedding (9 Items)	Curtains, Carpets, Blankets, Comforters, and 6 other items
Work Gloves (1 Item)	Work Gloves
Other Fiber Products (3 Items)	Tents, Tarps, Safety Nets
Facilities (4 Items)	Solar Power Generation Systems, Garbage Disposals, and 2 other items
Public-Works Projects (55 Items)	Portland Blast Furnace Cement, Pavement Material, Flushable Toilets, Greening of Rooftops, and 51 other items
Services (5 Items)	Printing, Cafeterias, Automobile Repair, and 2 other items
Total (17 Categories)	201 Items

2. Achievements of Green Purchasing

Achievements of Green Purchasing

(1) Progress of the Government's Green Purchasing System

- $\geq 90\%$ for most kinds of office paper, including copier paper
- $\geq 95\%$ for most stationery and office equipment

※ Concerning automobiles, since the end of FY 2004, all official vehicles have been replaced by low emission vehicles.

(Ratio: Designated Procurement Items included in the Government's Procurement in FY 2003 / Total Procurement)

(2) Quantity of Products with Reduced Environmental Impacts Disseminated in the Market

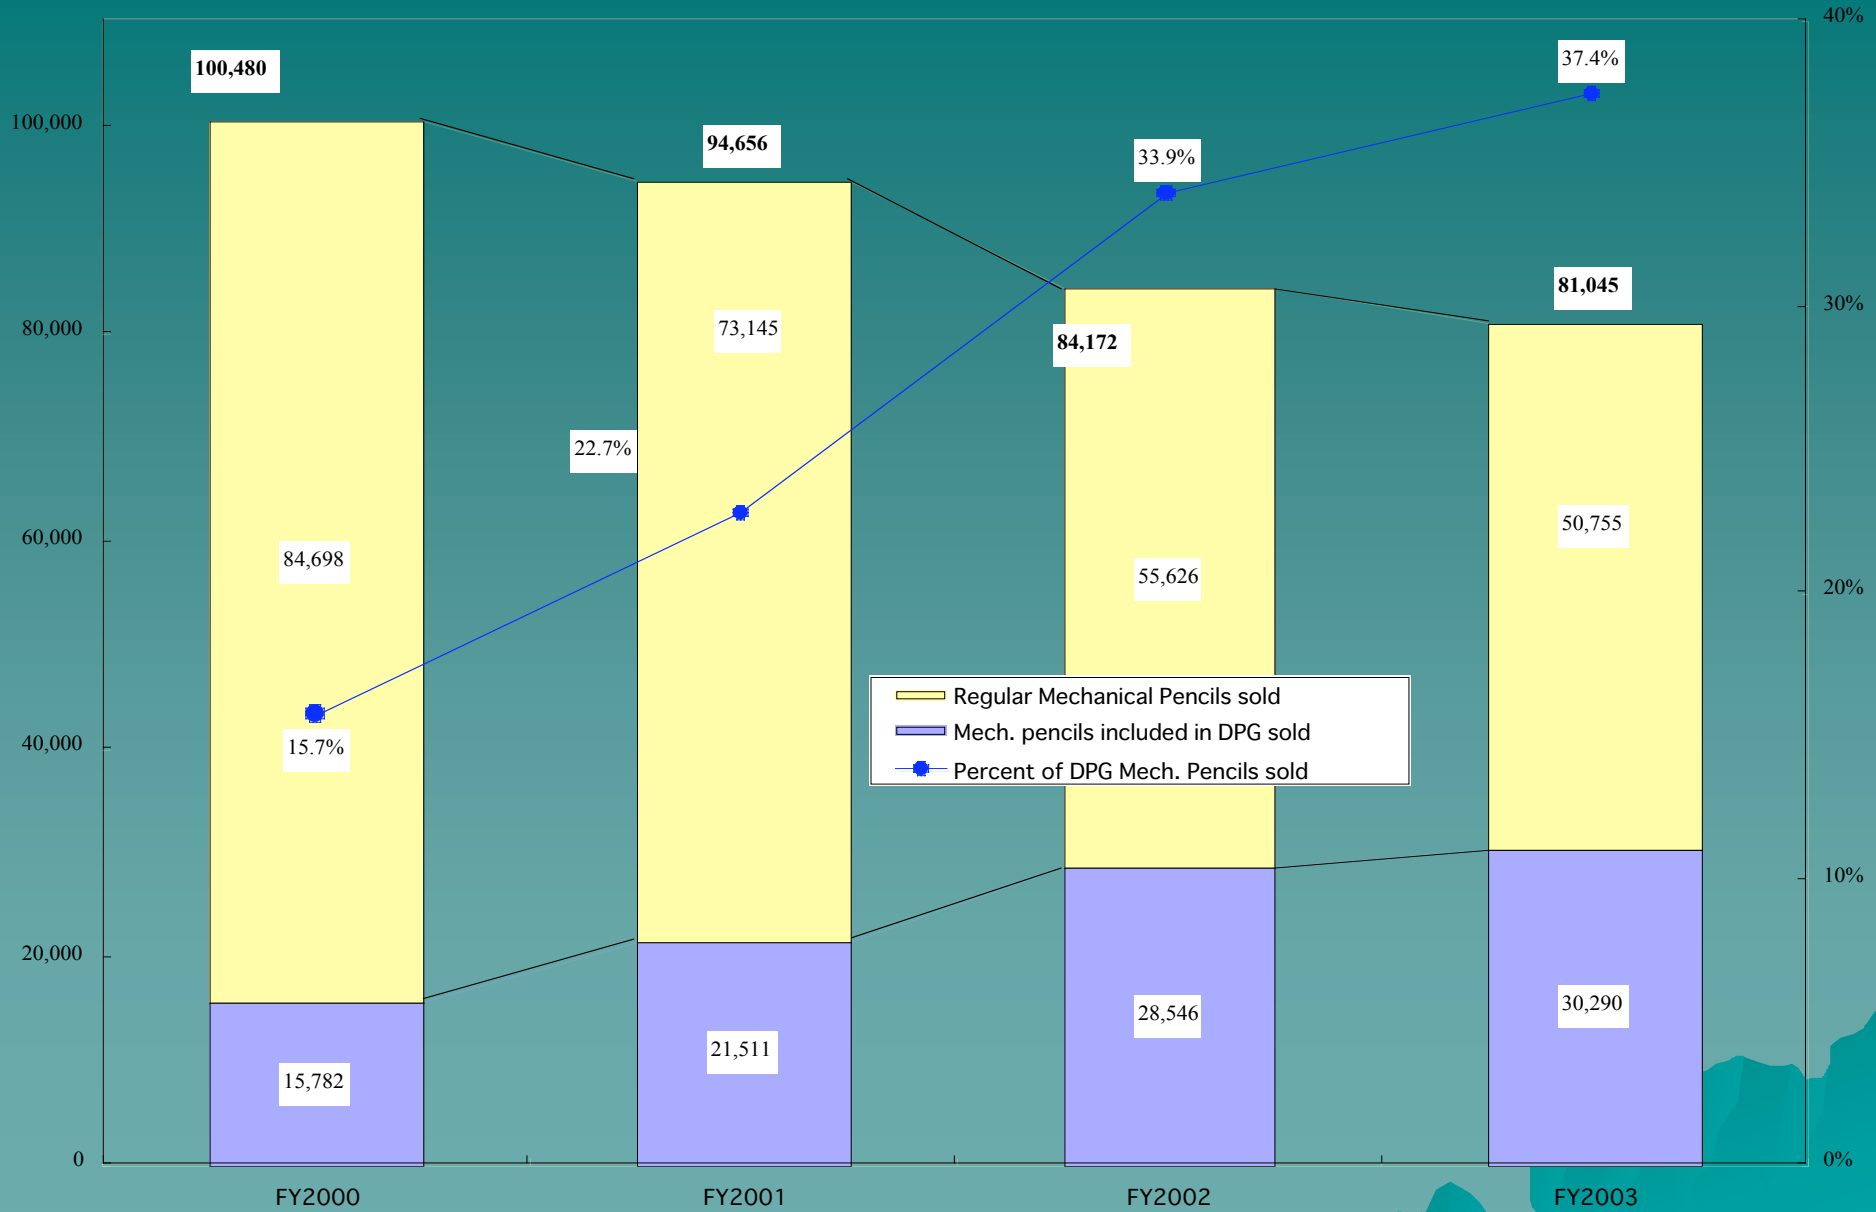

1. Copier Paper

Increased Volume of Environmentally Preferable Copier paper purchased

2. Mechanical Pencils

Thousands of Pens

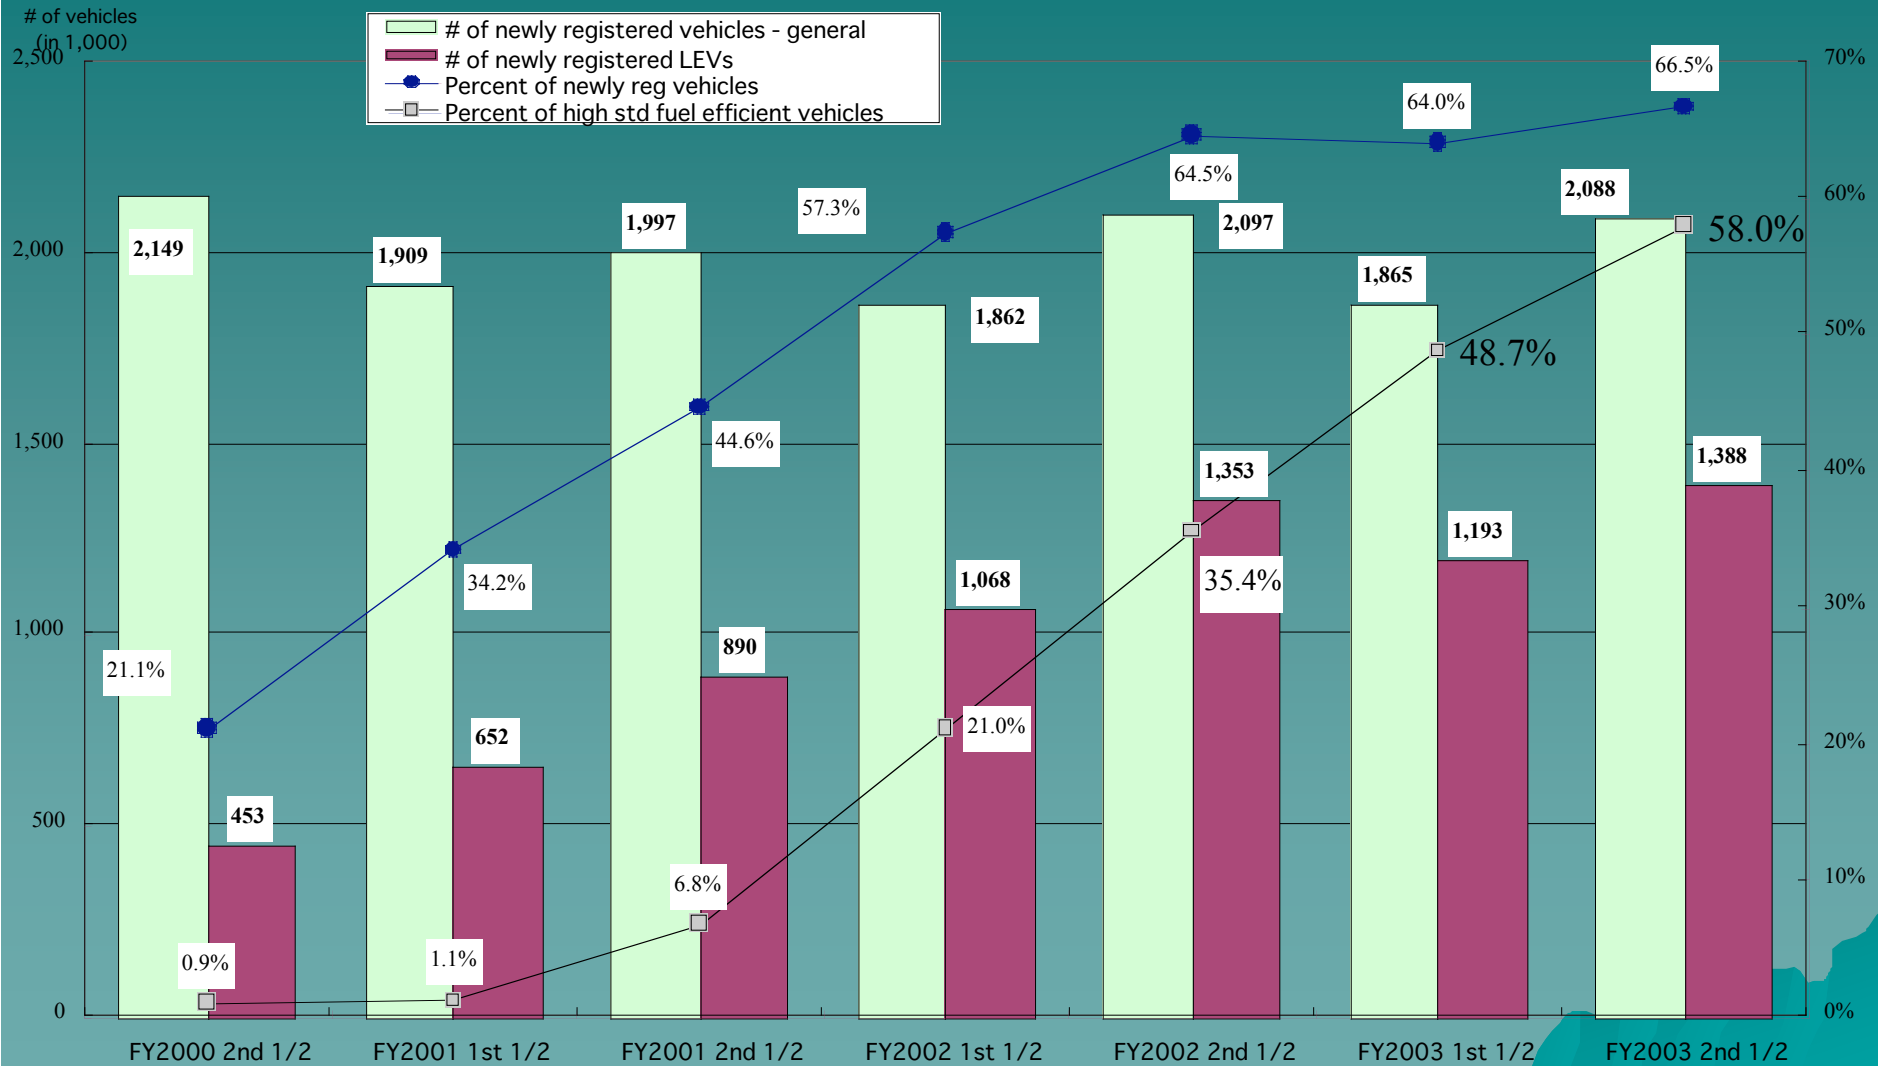

Increased Volume of Environmentally Preferable mechanical pencils purchased

Quantity of Newly Registered Low Emission Vehicles

3. Low Emission Vehicles

Yearly Change in Number of Newly Registered Low Emission Vehicles

Basic Policy

Issued by the MOE

i.e. Copier Paper: contains 100% recycled pulp content

Procurement Policy

Issued by Ministries

i.e. ○○ Ministry: Copier Paper
100% recycled pulp content : Procurement goal 100%

Development and Reduced Price of the Item

Amount of Copier Paper Purchased

Green Purchasing Law Established in September 2000

Government Procurement (Ministries and Agencies)
79.2% (in 2000) → 98.5% (in 2003)

i.e. Ballpoint Pens: contains more than 40% recycled plastic

Amount of Permanent Markers purchased

Regular Items : Green Purchasing Items

69 yen < 75 yen (in 2001)

70 yen = 70 yen (in 2005)

Government Procurement (Ministries and Agencies)

94.1% (2001) → 98.3% (2003)

3. The Green Purchasing Law and Efforts to Prevent the Greenhouse Effect

(1) The Green Purchasing Law and the Kyoto Protocol Target Achievement Plan

Basic Role of the Government

- The Government shall take the initiative to implement activities that prevent the exacerbation of the greenhouse effect

The government shall take the initiative to procure environmentally preferable items in order to shift demand towards more eco-friendly goods and services, which will contribute to reducing the emission of greenhouse gases.

(2) The Green Purchasing Law and the Government Action Plan

Considerations when purchasing or utilizing goods and services

- ① Reduced Environmental Impacts of Low Emission Vehicles
- ② Reduced Environmental Impacts of Energy-Efficient Electronic Appliances
- ③ Using Recycled Products such as Recycled Paper
- ④ Purchasing and using goods that do not contain Hydrofluorocarbons (HFCs) but instead contain environmentally preferable substances

(3) Results from the Government's effort to reduce CO₂ emissions under the Green Purchasing Law

Comparison of CO₂ Emission between 2000 (before Green Purchasing Law) and 2003

Category/Item	Previous CO2 Emissions Source	Amount of CO2 Emission Prevented (t-CO2)		
		Amount Prevented (Yearly)	Estimated Usage (years)	Amount Prevented (Total)
Plastic Office Supplies	Disposal / combustion	692	---	692
Office Automation Machines	Electricity Usage	290	5	1,449
Home Electronic Appliances	Electricity Usage	451	10	4,506
Air Conditioners	Electricity Usage	288	10	2,882
High-frequency Inverter Lighting Appliance	Electricity Usage	1,169	10	11,690
Cars	Gasoline combustion	3,186	5	15,929
Solar Power Generation System	Installation process	152	15	2,282
Portland Blast Furnace Cement	Industrial process	6,429	---	6,429
Total	---	12,657	---	45,859

4. The Future of Green Purchasing

(1) Further Development in the Governmental Sector

Status of Procurement Policies in Local Governments

- **47 Prefectures** **Developed by all Prefectures**

- **Districts / Cities** **Developed by 47.0% of Districts / Cities**
/ Cities

(Developed by 44.9% of Districts and Cities in 2003)

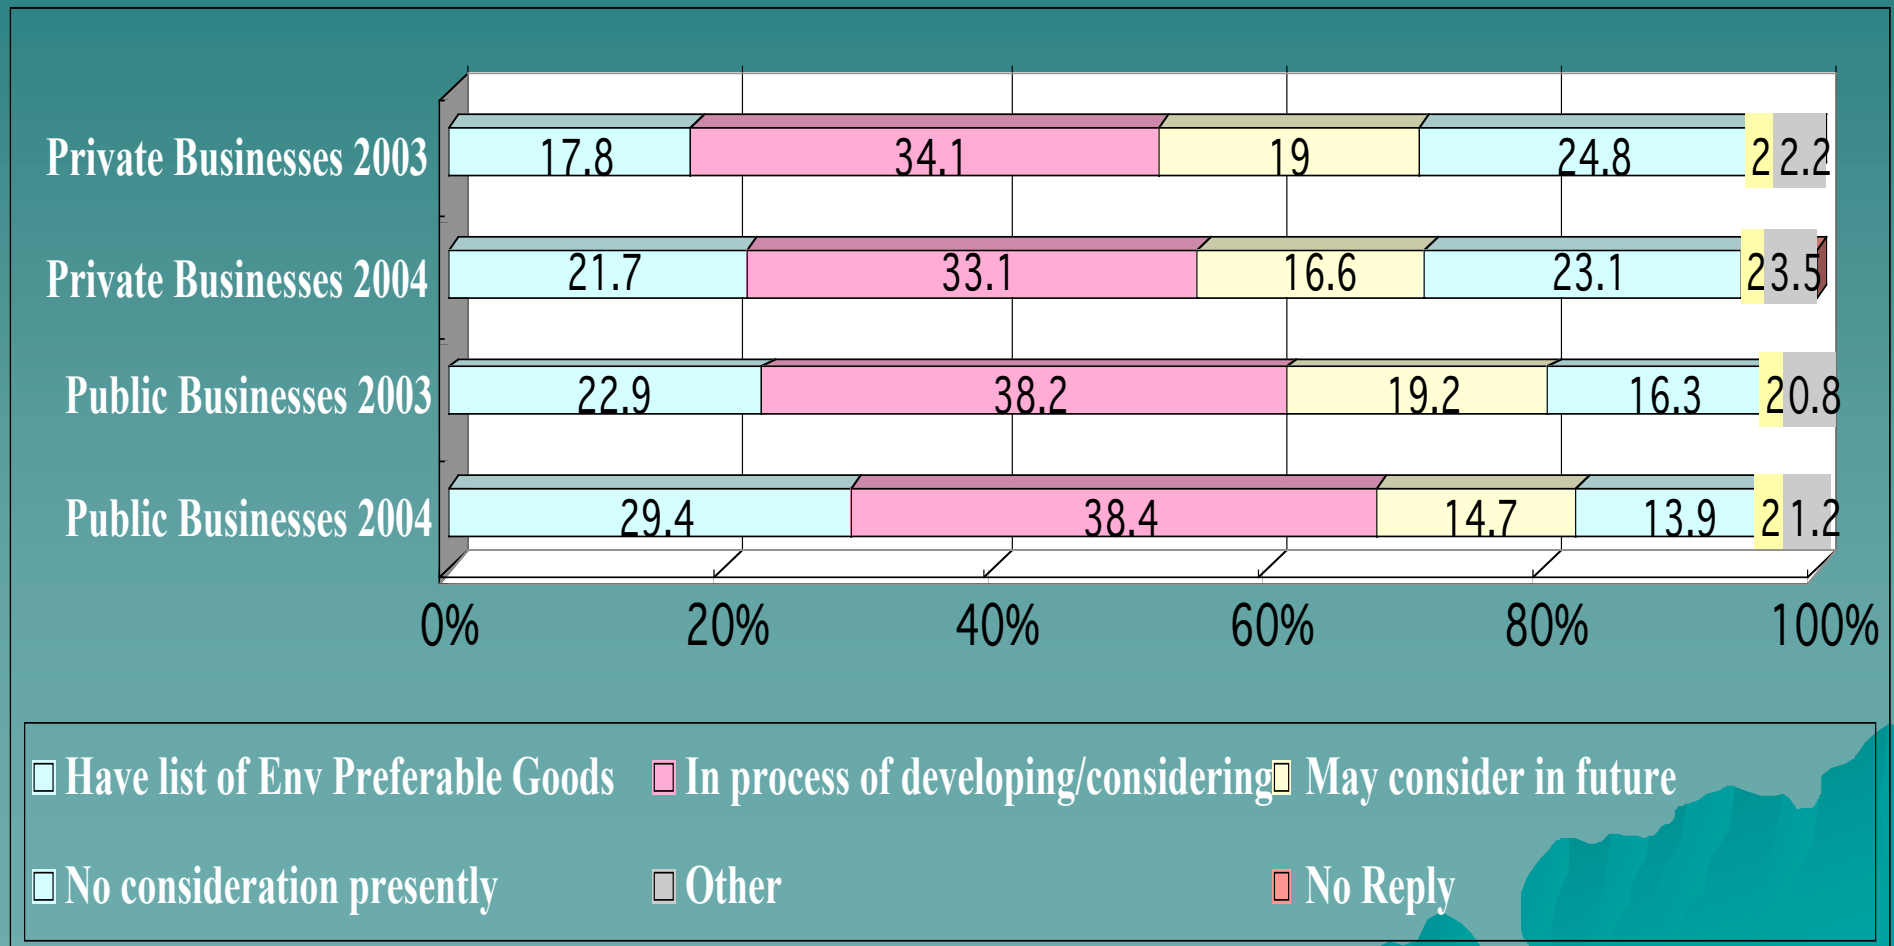

- **Towns / Villages** **Developed by 11.1% of Towns / Villages**
Villages

(Developed by 9.5% of towns and villages in 2003)

(2004 Data - taken from a questionnaire on Green Purchasing)

(2) Development in the Private Sector

Efforts of Private Businesses to Purchase Eco-Friendly Goods

グリーン購入法について

循環型社会の形成のためには、再生品等の供給面の取組に加え、需要面からの取組が重要であるという観点から、平成12年5月に循環型社会形成推進基本法の個別法のひとつとして国等による環境物品等の調達の推進等に関する法律(グリーン購入法)が制定されました。

同法は、国等の公的機関が率先して環境物品等(環境負荷低減に資する製品・サービス)の調達を推進するとともに、環境物品等に関する適切な情報提供を促進することにより、需要の転換を図り、持続的発展が可能な社会を構築を推進することを目指しています。また、国等の各機関の取組に関することのほか、地方公共団体、事業者及び国民の責務などについても定めています。

Providing Environmental Information on Goods and Services for Consumers

Provide clear environmental information on Goods and Services throughout it's lifecycle - from manufacture to disposal

Consumers should:

- Buy environmentally preferable goods
- Shift their lifestyle to one that reduces their environmental impacts

Businesses should:

- Advertise their eco-friendly products
- Provide incentives to develop new eco-friendly products

Creating a Society with Sustainable Development

(4) Future Objectives

Goal for FY 2010

To systematically implement green purchasing for the following organizations:

- ◆ Government : all local governments
- ◆ Businesses : ~ 50% of Public Companies and ~ 30% of Private Companies

Thank you

Hideki Onizaki

Ministry of the Environment, Japan
